

EMILY BEMILY

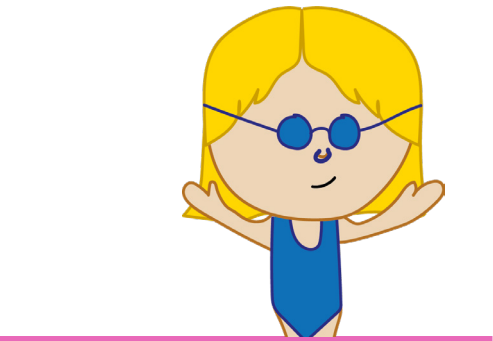

GAME SETUP

1. Put the colour cards in a place where all players can refer to them.
2. Shuffle the cards into a deck, placed face down within easy reach.
3. Reveal the first two cards and place them face up, either side of the deck, to form two discard piles.
4. Choose the first player at random.

GAME OBJECTIVE

Collect Emily and her favourite things to activate powers and score points! The game is played in rounds until one player reaches the required number of points for victory (see 'End of Game').

GAME TURN

Players take turns playing clockwise. Every turn involves the following three steps:

1. **Add a card to your hand** in one of two ways:
 - ♦ **EITHER** take the first two cards from the deck, add one to your hand, and discard the second faceup on the discard pile of their choice. If either discard pile is empty, you must put their card on that space.
 - ♦ **OR** take a single card from the top of one of the two discard piles (without looking through the discard piles).
2. **Play pairs of duo cards**, if you wish, to trigger their powers (see 'Card Details'). To do so, place the cards faceup in front of you and use the power. You may play any number of pairs of cards in one turn, and you don't have to play a pair if you have one in your hand.
3. **Decide whether to end the round.** If you have 7 points or more, both in your hand and in front of you, you can decide to end the round (see 'End of Round'). If you decide not to, the game continues with the person to your left!

END OF ROUND

When a player triggers the end of the round, they reveal their hand of cards and must announce **STOP** or **LAST CHANCE**.

STOP means you don't want to take a risk. All players reveal their hands and immediately score the points on their cards (in their hand and in front of them).

LAST CHANCE means you are willing to bet that you will have the most points at the end of the round. The other players each take a final turn (take a card + play cards), which they complete by revealing their hand, which is now protected from any other powers.

All players then count the points on their cards (in their hand and in front of them).

- ♦ If the triggering player's hand is **higher or equal** to that of their opponents, bet won! They score the points for their cards + the color bonus (1 point per card of the color they have the most of). Their opponents only score their color bonus.
- ♦ If their score is **less than** that of at least one opponent, bet lost! They score only their color bonus. Their opponents score points for their cards.

Special case: If the deck is empty at the end of a player's turn, the round ends immediately without scoring.

The points scored are added to those from the previous rounds. If no one has reached or exceeded the number of points required for victory, a new round starts: All cards are shuffled, and the deck and discard piles are reformed. The player to the left of the one who ended the previous round starts.

END OF GAME

If a player places all **4 magic rainbow cats**, they immediately win the game.

Otherwise, the game ends as soon as one player reaches or exceeds the required number of victory points:

- 2 players | **40** points
- 3 players | **35** points
- 4 players | **30** points

The player with the most points wins the game. In case of a tie, the player who earned the most points in the last round wins.

CARD DETAILS

DUO CARDS

The points for duo cards count whether the cards have been played or not, and they are only worth points as a pair. Duo cards also have powers - which are only activated when they are played as a pair.

PLANT BABIES (x9) - 1 point per pair
PROPGATE! Choose a discard pile, consult it without shuffling it, and choose a card from it to add to your hand. You do not have to show it to the other players.

ALBUMS (x8) - 1 point per pair
ON REPEAT! Take another turn (steps 1-3)!

BOOKS (x7) - 1 point per pair
TURN THE PAGE! Take the card at the top of the deck and add it to your hand.

SPIRITS AND MIXERS (x5 of each) - 1 point per spirit/mixer pair
MINESWEEPING! Steal a random card from another player and add it to your hand.

COLLECTOR CARDS

The more collector cards you have, the more points you get!

EMS (x6) - she's a girl of many hats! 0, 2, 4, 6, 8, or 10 points depending on whether you have 1, 2, 3, 4, 5, or 6 cards.

CITIES (x5) - Em's lived in all five, can you collect them all? 0, 3, 6, 9, or 12 points depending on whether you have 1, 2, 3, 4, or 5 cards.

MER/ANNA/MATT (x3) - the more Core Four in your life, the better! 1, 3, or 5 points depending on whether you have 1, 2, or 3 cards.

PARENTS (x2) - they're nothing if not together! 0 or 5 points depending on whether you have 1 or 2 cards.

MULTIPLIER CARDS

Multiply the points from your collector cards! Multiplier cards themselves do not count towards the number of collector cards that they multiply.

RECORD PLAYER (x1) - girl, put your records on! 1 point per album card.

BOOKCASE (x1) - so many books, so little time... 1 point per book card.

CORE FOUR (x1) - always better together! 2 points per Core Four card

THE BUBBLE (x1) - the perfect pair-ents! 3 points per parent card

MAGIC RAINBOW CAT CARDS

Looking good, feline good! Magic Rainbow Cats reward you for the colours you've collected - 1 point for each card of the colour you have the most of. If you have more than one Magic Rainbow Cat, you'll receive 1 point for each card of the colour you have the next most of. The same colour cannot be counted for more than one magic rainbow cat card.

4 Magic Rainbow Cats means an immediate win!
